Meter Pit / Vault Required? <input type="checkbox"/> Yes <input type="checkbox"/> No			Above Ground Enclosure Required? <input type="checkbox"/> Yes <input type="checkbox"/> No		

All service lines and appurtenances must be installed in accordance with EWW specifications and inspected by an EWW Inspector. Standard construction details and other pertinent information are available at www.eriewater.org/engineering. Inspection requests must be made with at least 24 hours prior notice by calling the Engineering Department at 870-8000, Ext. 206, 203, 241, 205 or 207 between the hours of 8 a.m. to 5 p.m. Same-day inspection requests may not be possible and could be subject to an additional fee. Only EWW employees can activate water service. Unauthorized activation / turn-offs are subject to a \$500 fine.

Water from a private well cannot enter the building(s) to be served by EWW water. If a private well will supply the property (but not the building served by EWW water), it is expressly understood and agreed that the well pump and all connections to interior plumbing of the building being served by EWW water must be removed and an EWW approved backflow preventer must be installed downstream of the EWW meter. An EWW Engineering Inspector must inspect the aforementioned work.

If applicant proposes to use an existing tap, EWW will determine whether or not the tap is useable. If it is NOT useable due to age, material, or other reason, a new tap must be installed and all applicable fees must be paid by applicant prior to installation of the new tap by EWW.

Water service may be provided during construction pursuant to a monthly fee. Water provided to a building under construction shall be used only in said building and with an EWW approved backflow preventer. Any other use of the water shall be considered theft of services. A monthly Construction Water Fee will be charged until a water meter is set. An EWW water meter and approved backflow preventer must be installed on new construction promptly.

By signing this Application, the applicant agrees to abide by the Rules and Regulations of EWW, in particular the provisions governing the terms, conditions, fees and charges relating to water service. **Connection fees for services 1.5" and larger are considered deposits. After tap installation is complete, costs incurred will be totaled and the applicant will either receive a refund or an invoice for additional charges.** EWW reserves the right to collect a deposit greater than the published rates, if circumstances warrant.
